Quest Site Administrator for SharePoint v1.0
Policy Management Settings

Policy Management	Setting	Description
Site Policy Settings		
	Site Content Alerts	Send alerts about changes to any document library or site list on the site to specified email addresses at a specified frequency
	Storage Quotas and Locks	Limit site storage; prevent site collection from using more than specified maximum storage size
	Users and Permissions	Control over membership in restricted sites and associated access rights
	Lists and Libraries	Control over content creation, approvals, attachments and limits on versioning and retention period
	Portal Site Connection	Connect the site collection to a specified portal site to allow site users to categorize lists, connect user profiles, link portal search and more
	Subsites	Configure maximum number of site levels the site connections can have
	Regional Settings	Set locale (language/region) for text and date/time display (dates, times, sort order)
Virtual Server Settings		
	Self-Service Site Creation	Enable/disable user creation of sites and secondary contact requirement
	Site Collection Use Confirmation and Auto-Deletion	Control over site collection usage checking and auto-deletion of unused collections
	General Settings	Control over alert enablement and limits, e-mail enabled document libraries and upload size limits
	Content Database Settings	Control over limits on the number of sites and site-level warnings
	Virtual Server E-mail Settings	Control over mail format and fields for notifications
